WONDER STACK · SESSION RESOURCE

Prompt Library Starter Pack

Your recipe box — save what works, reach for it instead of starting from scratch.

> *A prompt library is your recipe box. When something works, you save it. When you need it again, you reach for it. This worksheet gives you a starter set of prompts across the most common use cases — plus a blank table to capture your own.*

VOICE & CONTENT — Brand Voice Calibration

Use at the start of any new session where you need the AI to write in your voice.

```
You are writing in the voice of [YOUR NAME / BRAND NAME].
My tone is [3 WORDS]. My sentences tend to be [SHORT / LONG / MIXED].
I [DO / DO NOT] use humour — when I do, it is [TYPE].
Words I use: [YOUR PHRASES]. Words I never use: [YOUR NO-GO LIST].
Before writing anything, confirm you understand my voice.
Then ask me what I need today.
```

VOICE & CONTENT — Content Repurposing Engine

Turn one piece of content into multiple formats.

```
I am going to give you a piece of content. Repurpose it into:
- A LinkedIn post (conversational, 150–200 words, no hashtag spam)
- A short-form carousel outline (5–7 slides, one idea per slide)
- An email to my list (warm, direct, 200–300 words)
- A blog post introduction (hook + first two paragraphs)
Here is the original content: [PASTE YOUR CONTENT]
Before you start, confirm the formats and ask if there is anything
about my audience or voice I should tell you first.
```

DECKS & DOCS — Deck Structure Builder

Build a presentation from scratch or restructure one that is not landing.

```
I need to build a presentation for [AUDIENCE] about [TOPIC].
Goal: [INFORM / PERSUADE / INSPIRE / SELL].
They already know: [WHAT THEY KNOW].
They need to learn: [WHAT THEY NEED].
One thing I want them to walk away thinking or feeling: [YOUR OUTCOME].
Give me a slide-by-slide structure with a one-sentence description
of what each slide needs to do. Do not write the content yet.
```

THINKING & STRATEGY — Co-Founder Mode

Use when you want honest critique, not flattery.

```
I need you to act as a co-founder reviewing my work — not a cheerleader.
Find the holes, challenge my assumptions, tell me what I am missing.
Here is what I am working on: [PASTE YOUR WORK OR IDEA]
```

```
Give me your three most important concerns first.
Then tell me what is working. Praise is secondary.
```

THINKING & STRATEGY

Decision Clarity Prompt

```
I am trying to decide between two options.
Option A: [DESCRIBE]  |  Option B: [DESCRIBE]
My goal is: [WHAT I AM TRYING TO ACHIEVE]
My constraint is: [TIME / MONEY / ENERGY / OTHER]
Do not tell me which to choose. Instead, ask me the three questions
that would make this decision obvious if I could answer them clearly.
```

RESEARCH & LEARNING

Explain It Simply

```
Explain [TOPIC / CONCEPT / TOOL] to me as if I am intelligent
but completely new to this. No jargon. Use an analogy if it helps.
Then tell me the three things I would need to understand next
if I wanted to go deeper.
```

RESEARCH & LEARNING

Summarise and Extract

```
I am going to paste a [DOCUMENT / ARTICLE / TRANSCRIPT].
Please give me:
1. A three-sentence summary of the main point
2. The five most important insights or takeaways
3. Any questions this raises that I should think about
Here it is: [PASTE CONTENT]
```

YOUR LIBRARY

Save Your Own Prompts Here

When a prompt produces something genuinely surprising — save it before you close the session.

Prompt name	What it does	Date saved

The golden rule: *Context windows reset. Your library does not. Save the prompt, not just the output.*
